

Common European Data Spaces and Robust AI for Transparent Public Governance

1

10+ HIGH-QUALITY DATASETS for more transparent and accountable public governance in Europe.

2

Interoperable and secure connectors and APIs to enrich **6 COMMON EUROPEAN DATA SPACES (CEDS)**.

3

Development of robust algorithms to facilitate **EVIDENCE-BASED DECISION-MAKING IN PUBLIC ADMINISTRATION** and for effective big data management and Machine Learning operations.

4

Validation of new datasets and technologies through dedicated **PILOT STUDIES** in a relevant setting with end users in 3 different countries (Italy, Slovenia and Ukraine).

Coordinator

Scientific Coordinator

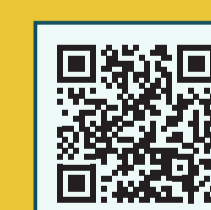

CEDAR project has received funding by the European Union's Horizon Europe, under grant agreement no 101135577

Coordinator: **Dr. Petros Daras** / daras@iti.gr
